Anyways, this is what a 1616 modern gothic chess set believes the courier is. See how the "ball" is gone and replaced with a horse. It's on the bottom row, third from the right.

SAXON, SASSY, and SASSO's. You're a SAXO, the ones that spawned? (or ceived) and crossed the saso and the sasy, and set up camp at burkina faso north africa to somehow temporarly displace the cala fico fiji SII to SIIO solar pressure pole. Good luck!

Anywho, the people at S&M, the Sado, *ahem* shadow cats, who are behind sudburies city hall crown of thorns tried to turn me into the jester fountain, and some believe it was meant for you, yet the traditional books all paint you as a MARE, E.BAYER. I dunno. Again, good luck.

I guess it's whether the horse ever fell off the ball, or whether there is a better name for the horse or something? I dunno. You need pyramid ancestry supposedly to be the holy water fountain. They keep that information a little harder to find. Hemiunu. That's right cause breaking supermans back by falling of the horse like its born on the fourth of july meets mojo was an "accident". Total accident. New rule. If you see three tits on a lady then total recall. Everybody pulls out.
